

FULL STACK DEVELOPER

INTERVIEW QUESTIONS MASTER

PACK (2026)

Prepared by **Vojasvi Reddy**

HTML

(Fundamentals)

1. Difference between **HTML** and **HTML5**
2. What are **semantic tags**?
3. Inline vs block elements
4. What is the **DOM**?
5. Role of **<meta>** tags
6. What is accessibility in HTML?
7. What is **ARIA**?
8. Forms and input validation
9. Cookies vs localStorage vs sessionStorage
10. What is the purpose of iframes?
11. SEO-friendly HTML practices
12. How does browser rendering work?
13. How do you handle accessibility in **HTML**?
14. How do you optimize HTML for SEO?

HTML

(Advanced)

1. What is **progressive rendering**?
2. What is the **shadow DOM**?
3. Custom data attributes usage
4. Difference between **defer** and **async** scripts
5. How does HTML support responsive design?
6. What are web components?
7. Explain **canvas** and **SVG** differences
8. How do you optimize page load time?
9. Explain the difference between
Microdata vs RDFa vs JSON-LD
10. How do you include external resources in
HTML?
11. How do you handle accessibility in HTML?
12. Explain the Internationalization tag

CSS

(Fundamentals)

1. Explain the box model
2. Margin vs **padding**
3. Position types in CSS
4. Flexbox basics
5. Grid basics
6. What is **specificity**?
7. Inline vs internal vs external CSS
8. Media queries usage
9. What is responsive design?
10. Explain the difference between
Microdata vs RDFa vs JSON-LD
11. How do you include external resources in
HTML?
12. Explain the z-index?

CSS

(Advanced)

1. CSS variables and benefits
2. What is **BEM** methodology?
3. Animations vs transitions
4. What is **stacking** context?
5. How do you optimize CSS performance?
6. What is **overflow** hidden used for?
7. Explain **rem** vs **em** vs **px**
8. What are CSS preprocessors?
9. Explain CSS performance optimization?
10. How do you include external resources in HTML?
11. Explain the Internationalization tag

JavaScript

(Core)

1. **var vs let vs const**
2. What is **hoisting**?
3. Explain data types
4. What are **closures**?
5. What is **scope**?
6. Function declaration vs expression
7. What is **strict mode**?
8. What is NaN?
9. Difference between **==** and **===**
10. What is DOM manipulation?
 1. **var** vs **let** vs
 2. What is NaN?
 3. Difference between **==** and **===**
10. What is DOM manipulation?

JavaScript

(Advanced)

1. Event loop explanation
2. Microtasks vs **macrotasks**
3. Promises and chaining
4. Async/await
5. Call, apply, bind
6. Prototype chain
7. Debouncing vs throttling
8. Shallow vs deep copy
9. Currying functions
10. What is **memoization**?
11. How do modules work?

React

(Core)

1. What is React?
2. Virtual DOM
3. Props vs state
4. Functional vs class components
5. What are **hooks**?
6. `useState` usage
7. `useEffect` lifecycle
8. Controlled components
9. Keys in lists
10. Component reusability

React

(Advanced)

1. useMemo vs useCallback
2. Context API
3. Redux vs Context
4. Lazy loading in React
5. Code splitting
6. React reconciliation
7. SSR vs CSR
8. Hydration concept
9. React performance optimization
10. Error boundaries

Backend Fundamentals

(APIs + REST + Middleware)

1. Difference between REST and SOAP
2. What is an API?
3. HTTP methods (GET, POST, PUT, DELETE)
4. Explain CRUD operations
5. What is an endpoint?
6. Role of middleware
7. Status codes (2xx, 4xx, 5xx)
8. RESTful vs GraphQL
9. CORS policy
10. What is JWT?
11. Error handling in backend

Node.js

(Core)

1. What is **Node.js**?
2. npm usage
3. Package.json file role
4. How do callbacks work?
5. Difference between **setImmediate** vs *setTimeout*
6. EventEmitter usage
7. Module.exports vs exports
8. What is middleware in **Node**?
9. RESTful vs GraphQL
10. Explain async nature of Node.js
11. How does the event loop work?
12. Streams usage

Express.js

(Core)

1. What is **Express.js**?
2. Setting up a new app
3. Explain **middleware**
4. Sending JSON response
5. URL parameters
6. What is a route?
7. Route parameters
8. Error handling
9. Express router
10. Using middleware
11. Express vs Koa

SQL

(Core)

1. What is SQL?
2. Primary vs foreign keys
3. Difference between INNER and LEFT JOIN
4. Filtering with WHERE
5. Sorting results
6. GROUP BY explanation
7. HAVING clause usage
8. SQL injection
9. Indexes importance
10. ACID properties
11. Express vs Koa

MongoDB / NoSQL

(Core)

1. SQL vs NoSQL
2. MongoDB collections
3. Document structure
4. Filtering data
5. Aggregation
6. Indexes
7. Mongoose vs native driver
8. ACID compliance
9. Sharding concept
10. Indexes importance
11. ACID properties

Authentication & Security

(Core)

1. Password hashing
2. JWT usage
3. OAuth 2.0 overview
4. What is CSRF?
5. Handling CORS
6. What is API rate limiting?
7. Protection against SQL injection
8. HTTPS vs HTTP
9. Types of authentication
10. Security best practices

System Design Basics

(Core)

1. What is system design?
2. Load balancing
3. Database scaling
4. Microservices concept
5. Caching strategies
6. CAP theorem
7. Event-driven architecture
8. CDNs (Content Delivery Network)
9. Message queues
10. Database replication

Popular System Design Interview Problems

1. Design a URL shortener
2. Design a social media platform
3. Design a message queue service
4. Design an e-commerce website
5. Design a web crawler
6. Design a file sharing system
7. Rate limiting service
8. Design a newsfeed like Facebook
9. Design a cab booking service

DevOps & Deployment

(Core)

1. What is DevOps?
2. CI/CD pipelines
3. Docker basics
4. Container orchestration
5. Load balancing
6. Monitoring and logging
7. Kubernetes overview
8. Rate limiting service
9. Design a newsfeed like Facebook
10. Design a cab booking service

Project-Based Interview Questions

1. TODO application
2. REST API with Express.js
3. User authentication
4. CRUD operations with databases
5. Real-time chat application
6. Frontend state management
7. File upload functionality
8. Background job processing
9. Integrating third-party APIs
10. Full-stack MERN app

HR Questions

1. Tell me about yourself
 2. Why do you want to work here?
 3. Strengths & weaknesses?
 4. Teamwork experiences?
 5. Conflict resolution skills?
 6. Career goals?
-

Each interview is a learning opportunity.

Focus on growth, feedback, and staying calm
under pressure.

Good luck!
